Check the engine oil level. (1) Where conditions permit, the oil tank should be checked and oil added, if necessary within a period of 5 to 60 minutes after engine shutdown. (2) If the engine was stopped for between 1 and 10 hours, perform an idle run Ref. AMM TASK 71-00-00-710-012 of at least 3 minutes duration prior to servicing to ensure the oil level indicated on the sight glass is correct within a period of 5 to 60 minutes after engine shut down. (3) If the engine was stopped for more than 10 hours, dry crank the engine Ref. AMM TASK 71-00-00-710-045 followed by a start and idle run of a least 3 minutes duration before servicing to ensure the oil level indicated on the sight glass is correct within a period of 5 to 60 minutes after engine shut down. (4) Servicing is not required prior to departure if the engine was serviced on arrival or the oil tank sight glass shows a minimum of 23 quarts or the cockpit indication shows a minimum of 19 quarts and pre-departure walkaround checks confirm no oil pools/drips from drain mast. (5) If extended cranking has been undertaken e.g. following core washing, maintenance activity, etc, prior to servicing, run the engine at idle Ref.
